ACCOUNTING

Associate of Science

BUSINESS ADMINISTRATION

Associate of Applied Science

Option I: Accounting Technology

About the Program and Career Opportunities

Opportunities in accounting are expanding. With the increasing population, the industrial development, and growth in large and small businesses in North Alabama, the need for competent accountants is rapidly becoming more intense. The Accounting curriculum is designed to help students take advantage of these employment opportunities. Students are given training in accounting theories and skills necessary for entry into the accounting profession. The Accounting curriculum aims to develop the following competencies:

- Understanding the principles of organization and management in business operations
- Ability to practice accounting, including income tax;
- Knowledge in specific elements of business law, economics, and information systems;
- Knowledge of human relations as they apply to successful business operations in a rapidly expanding economy; and
- Understanding and skill in effective communication for business.

How Do I Apply?

Everyone must submit an application for admission to the Admissions Office on the Decatur or Huntsville campus. At that time, you'll receive further information on admissions requirements.

How Much Will it Cost?

Tuition at Calhoun – the fees paid to take classes – is among the lowest in the area. A full-time student will pay between \$1140-\$1520 per 15-week semester. A single class will cost only \$285. Since the college does not have dormitories, the only other costs will be for transportation to and from class and books and supplies. And, if you need help with college costs, the Office of Student Financial Services has information on grants, work study, scholarships, and loans.

For more information, please call 256-306-2676

Curriculum

COURSES	CREDIT HOURS	Accounting	Accounting Technology
