

INDEX OF COURSE PREFIXES

COURSE DESCRIPTIONS

Prefix	Course	Page No.	Prefix	Course	Page No.
ACR	Air Conditioning & Refrigeration	115	INT	Industrial Maintenance Technology	154
ADM	Advanced Manufacturing.....	114	MIC	Music Industry Communications	165
ALI	Alabama Language Institute	150	MCM	Mass Communications.....	157
ANT	Anthropology	118	MSG	Massage Therapy	158
ARS	Aerospace Technology	117	MTH	Mathematics.....	159
ART	Art	118	MTT	Machine Tool Technology	155
AST	Astronomy	121	MUL	Music	161
BAR	Barbering	121	MUP	Music-Private	162
BSS	Basic Study Skills.....	124	MUS	Music-General	163
BIO	Biology	122	NAS	Nursing Assistant	165
BUS	Business.....	124	NUR	Nursing	166
CHD	Child Development	129	ORI	Orientation	167
CHM	Chemistry.....	128	PCT	Process Technology.....	175
CIS	Computer Information Systems	130	PED	Physical Education	167
CIT	Cosmetology Instructor Training.....	135	PFC	Photography & Film	171
CLT	Clinical Laboratory Technology	134	PHL	Philosophy	172
COS	Cosmetology	136	PHS	Physical Science	172
CRJ	Criminal Justice.....	139	PHY	Physics.....	175
DDT	Design Drafting Technology	141	POL	Political Science	176
DNT	Dental Assisting	140	PRL	Paralegal	177
ECO	Economics	142	PSY	Psychology.....	177
EDU	Education	143	PTA	Physical Therapy	172
EGR	Engineerig	143	RDG	Basic Reading Skills	124
ELT	Electrical Technology	143	REL	Religion.....	178
EMP	Emergency Medical Paramedic	145	RLS	Real Estate	179
EMS	Emergency Medical Services.....	147	RTV	Radio and TV Broadcasting	180
ENG	English	148	SOC	Sociology	182
FRN	French	150	SUR	Surgical Technology.....	183
FSC	Fire Services Management	150	SPA	Spanish	182
GEO	Geography and Physical Geography	150 & 172	SPH	Speech Communications.....	183
GRN	German	151	SWT	Social Work Technology.....	183
HED	Health Education	151	THR	Theatre	184
HIS	History	151	VCM	Visual Communications.....	184
HPS	Health Science.....	153	WKO	Workplace Skills Enhancement	186
IDS	Interdisciplinary Studies.....	153			
ILT	Industrial Electronics Technology	153			

CREDIT HOUR EQUIVALENCIES

CREDIT HOUR EQUIVALENCIES – The ratio of weekly contact hours to credit hours varies with the type of instruction being used. The College will recognize the following methods or types of instruction:

THEORY. (T) One hour of theory instruction under the supervision of an instructor plus an average of two hours of out-of-class study per week. 1:1

EXPERIMENTAL LABORATORY. (E) Two hours of experimental laboratory under the supervision of an instructor plus an average of one hour of out-of-class assignments per week. 2:1

PED ACTIVITY. (A) Two hours of physical education class activity/practice under the supervision of an instructor with out-of-class assignments per week. 2:1

MANIPULATIVE LABORATORY. (M) – Three hours of practice/manipulative laboratory under the supervision of an instructor with no out-of-class assignments per week. 3:1

SKILLS LABORATORY/CLINICAL PRACTICE. (S or C) - Three hours of skills laboratory or clinical practice under the supervision of an instructor. 3:1

Skills Laboratory/Clinical Practice is the term for skills laboratory (S) and clinical experiences (C) which are under the direct supervision of faculty. There may be out-of-class assignments per week, but they are not required. For example, skills laboratory and clinical experiences may have out-of-class assignments whereas a computer laboratory may not require an out-of-class assignment.

PRECEPTORSHIP. (P3 or P5) - Three or five hours of clinical experience per week under the supervision of a health care professional who is currently licensed, has expertise in the selected clinical area, and serves as a facilitator of learning. 3:1 or 5:1.

Preceptorship is the term used for clinical experiences which are supervised by currently licensed health care professionals who have expertise in a selected clinical area. Preceptors are employees of a clinical agency who are approved by faculty of the program and the administration of the clinical agency. Objectives for the preceptorship are specified. A designated faculty member is readily available (by telecommunication devices, for example) to the preceptor and student during the *preceptorship* experiences. Students enrolled in fields of study for which programmatic accreditation and/or licensing bodies require an 8:1 preceptorship ratio must comply with discipline-specific time-to-credit criteria.

As the contact hours for courses using preceptorship clinical experiences are entered, specify in the column for “clinical” the actual number of contact hours per week followed by a bold (P3) or (P5).

INTERNSHIP (I) - Five hours of experimental internship per week under the control and supervision of the employer on the job with coordinated employer/college representative planning. 5:1

Internship is the term used to include cooperative education, practicums, and sponsored work instruction. *Internship* involves the development of job skills by providing the student with a structured employment situation that is directly related to, and coordinated with, the educational program. Student activity in “internship” is planned and coordinated jointly by an institutional representative and the employer, with the employer having the responsibility for control and supervision of the student on the job. Students enrolled in fields of study for which programmatic accreditation and/or licensing bodies require a 10:1 internship ratio, must comply with field-specific time-to-credit criteria.

The number of clock hours of each type of instruction is stated in each course description. Types of instruction may be mixed within one course. In that event, the number of contact hours for each type of instruction is spelled out in the following order: Theory (T), Experimental Laboratory (E), PED Activity (A), Manipulative Laboratory (M), Skills Laboratory/Clinical Practice (S or C), Preceptorship (P3 or P5), and Internship (I). On the right side of the column, the number of credit hours for the entire course is given.
